Bocboc National High School

PROJECT EXPERIENCE

LunaSync Apartment Management System

Project Manager / Quality Assurance / UI Designer

- Led project planning and coordination for an apartment management application developed using Android Studio.
- Contributed to UI design and workflows for tenant, room, payment, garbage collection, and announcement management.
- Performed quality assurance activities to verify system functionality and identify issues during development.

CakeLand Express

UI/UX Designer

- Designed the user interface and prototype of a cake ordering system using Figma in collaboration with two group members.
- Contributed to the visual layout, user flow, and overall user experience of the prototype.

Museum Attendance Monitoring System

Quality Assurance / Testing Lead

- Handled quality assurance and testing for a web-based attendance monitoring system for the BukSU Studies Center.
- Prepared and organized test cases to verify system functions and document testing results and identified issues.

Smart Screen System: Enhancing Commuter Transport Connectivity Using Real-Time Information

Research and Development Project / Project Manager

- Managed project planning, coordination, and development activities for a real-time bus tracking and management system.
- Handled functional testing, test case preparation, organization of test results, and system evaluation.
